VOLUME 4 1987

SUBJECT INDEX

Abstinence
  alcoholism, 283
  alcohol withdrawal syndrome, 215
  anxiety, 215
  event-related brain potentials, 283
  human studies, 215
  hyperventilation, 215
  relapse, 215
  stimuli, high incentive, 283
Acetaldehyde
  acute alcohol intoxication, 81
  S-adenosyl-L-methionine, 81
  alcohol, 81
  aminolevulinate dehydratase activity, 81
  blood, human, 473
  catalase, 45
  drug comparisons, 45
  ethanol metabolism, 45, 473
  glutathione, 81
  heart homogenates, 45
  high performance liquid chromatography, 473
  liver concentrations, 81
Acetaldehyde dehydrogenase
  alcohol dehydrogenase, 199
  alcohol self-selection, 347
  clofibrate, 199
  cyanamide, 347
  drinking, 347
  route of administration, 347
  tetrahydroisoquinoline, 199
  voluntary alcohol consumption, 199
Acetaminophen, 69
  drug interactions
  hepatotoxicity
  N-acetylcysteine
Acute alcohol intoxication
  acetaldehyde, 81
  S-adenosyl-L-methionine, 81
  alcohol, 81
  aminolevulinate dehydratase activity, 81
  dose-related effects, 293
  ethanol, 293
  event-related potentials, 293
  glutathione, 81
  hangover effects, 503
  human studies, males, 293
  liver concentrations, 81
  open-field behavior, 503
  running-wheel activity, 503
  temperature regulation, 503
  visual sustained attention, 293
Acute tolerance
  chronic administration, 255
  early evoked potentials, 255
  ethanol effects, 255
  ethanol sensitivity, 57
  inbred strains, 57
  selective breeding, 57
  sleep time, 57
S-Adenosyl-L-methionine, 81
  acetaldehyde
  acute alcohol intoxication
  alcohol
  aminolevulinate dehydratase activity
  glutathione
  liver concentrations
Alcohol
  acetaldehyde, 81
  acute alcohol intoxication, 81
  S-adenosyl-L-methionine, 81
  alpha-adrenergic receptors, 25
  aminolevulinate dehydratase activity, 81
  auditory evoked potentials, 249
  calcium-(Ca^{++}) ATPase, 25
  chronic alcohol ingestion, 485
  cigarette smoking, 457
  cytosilic Ca^{++}
  differential concentration response curves, 63
  Fetal Alcohol Syndrome, 11
  genetic influences, 249
  glutathione, 81
  guinea pigs, 11
  heavy drinking, 509
  hepatic plasma membranes, 25
  human studies, 509
  human studies, women, 457
  intestinal enzyme activity, 405
  length-tension relationships, 485
  liver concentrations, 81
  marihuana, 457
  maternal alcohol consumption, 11
  menstrual cycle, 457
  muscle fiber composition, 485
  operant behavior, 63
  oral self-administration, 63
  postnatal development, 405
  prenatal exposure, 405
  reinforcement, 63
  skeletal muscle development, 11
  strain differences, 63
  urinary dolichol levels, 509
Alcohol abuse
  alcohol dependence syndrome, 135
  biological state markers, 135
  cognition, 289
  correlation tests, 135
  ERP components, 289
  human studies, 289
Alcohol, chronic, 231
  auditory evoked potentials
  human studies, children
  in utero exposure
  sensorineural hearing loss
Alcohol consumption, 449
  enkephalinase inhibition
  genetic breeding
Alcohol dehydrogenase, 199
  acetaldehyde dehydrogenase
  clofibrate
  tetrahydroisoquinoline
  voluntary alcohol consumption
Alcohol dependence, 49
  buspirone
  drinking
  human cerebrospinal fluid
  monkeys
  voluntary alcohol intake
Alcohol dependence syndrome, 135
  alcohol abuse
  biological state markers
  correlation tests
Alcohol drinking, 181
  hippocampus
  tetrahydro-β-carboline
Alcohol metabolism, 143
  cephalosporin antibiotics
Alcohol preference, 37
  gustatory neocortex
Alcohol self-selection, 347
  acetaldehyde dehydrogenase
  cyanamide
  drinking
  route of administration
Alcohol sensitization, 463
  diethyldithiocarbamic-acid-methyl-ester
  disulfiram
  disulfiram-ethanol reaction
  dose-dependent effects
  heart rate
  mean arterial pressure
Alcohol withdrawal syndrome, 215
  abstinence
  anxiety
  human studies
  hyperventilation
  relapse
Alcoholic liver disease, 225
  auditory evoked potentials, brainstem
  auditory evoked potentials, somatosensory
  hepatic encephalopathy
Alcoholic predisposition, 1
  alcoholism
  human studies, alcoholics
  5-hydroxyindoleacetic acid/anthranilic acid ratio
  5-hydroxyindoleacetic acid/indoleacetic acid ratio
  serotonin levels
  tryptophan metabolism
Alcoholics
  event related potentials, 275, 307
  family histories, 301
  first-degree relatives, 307
  human family studies, 307
  human studies, 275, 301
  P3 amplitude, 275

event-related brain potentials, 283
event related potentials, 241
family history, 265
geographic latitude, 127
handedness, 127, 207
health risks, 87
human studies, 207, 241
human studies, alcoholics, 1, 127
human studies, high risk boys, 315
human studies, males, 265
5-hydroxyindoleactic acid/anthranilic acid ratio, 1
5-hydroxyindoleacetic acid/indoleacetic acid ratio, 1
morphine influences, 149
non-alcoholic beverages, 87
P3 amplitude, 315
season of birth, 127
serotonin levels, 1
stimuli, high incentive, 283
theoretical considerations, 127
tryptophan metabolism, 1
visual event-related potentials, 265
visually evoked potentials, 241
Alcoholism identification, 175
blood chemistry
human studies, young adults
Alcoholism, paternal, 323
human studies, young males
P3 amplitudes
visual event-related potentials
Aldehyde dehydrogenase, 413
brain, human
3,4-dihydroxyphenylacetaldehyde
isozyme distribution
Aldehyde dehydrogenase activity, 121
blood assay
human study
Alpha-adrenergic receptors, 25
alcohol
calcium-(Ca^{++}) ATPase
cytosilic Ca^{++}
hepatic plasma membranes
3-Amino-1,2,4-triazole pretreatment, 73
blood ethanol levels
catalase
first pass effect
gastrointestinal route
oral administration
Aminolevulinate dehydratase activity, 81
acetaldehyde
acute alcohol intoxication
S-adenosyl-L-methionine
alcohol
glutathione
liver concentrations
Antipunishment effects, 481
ethanol
rapid induction
tolerance
Anxiety, 215
abstinence
alcohol withdrawal syndrome
human studies
hyperventilation
relapse
Apparatus
eight-arm maze, 433
holeboard, 17
Area postrema, 169
conditioned taste aversion
ethanol
Atrium, 7
beta adrenoreceptors
chronic ingestion
contractility
ethanol
inotropic response
muscarinic adrenoreceptors
Auditory cortex, 257
distractor stimuli
ethanol
event-related potentials
human studies
Auditory event-related potentials, 265
alcoholism
family history
human studies, males
visual event-related potentials
Auditory evoked potentials
alcohol, 249
alcoholic, chronic, 231
genetic influences, 249
human studies, children, 231
in utero exposure, 231
sensorineural hearing loss, 231
Auditory evoked potentials, brainstem, 225
alcoholic liver disease
auditory evoked potentials, somatosensory, 225
hepatic encephalopathy
Auditory evoked potentials, somatosensory, 225
alcoholic liver disease
auditory evoked potentials, brainstem
hepatic encephalopathy
Auditory recovery function, 315
alcoholism
human studies, high risk boys
P3 amplitude
Axonal sprouting, 367
ethanol
lesions, entorhinal cortex
Axonal transport, 385
ethanol exposure
peripheral neuropathy
sciatic nerve

Benzodiazepine antagonist, 425
ethanol intoxication
Ro 15-1788
Benzodiazepine receptor stimulation, 469
drinking
ethanol
GABA transmission
Beta adrenoceptors, 7
atrium
chronic ingestion
contractility
ethanol
inotropic response
muscarinic adrenoreceptors
Biological state markers, 135
alcohol abuse
alcohol dependence syndrome
correlation tests
Blood alcohol curve, 77
dogs
ethanol metabolism
ethanol pharmacokinetics
Blood assay, 121
aldehyde dehydrogenase activity
human study
Blood chemistry, 175
alcoholism identification
human studies, young adults
Blood ethanol levels
3-amino-1,2,4-triazole pretreatment, 73
D,L-carnithine supplementation, 31
catalase, 73
ethanol metabolism, 31
first pass effect, 73
gastrointestinal route, 73
oral administration, 73
rats, males, 31
Blood human, 473
